GENERATOR/POWER BACKUP

The Institution has 250KVA diesel generator. The total set-up in the institution ensures the uninterrupted power supply to the institution for its various functions. Our college is having their power back up (generators) for enough back up energy around 10 hours for entire load. The generators turned on and all the protected electric loads seamlessly transferred to the backup power system.

Our college works to ensure that we have access to back up power to continue serving under any condition.
